CHIARA

Mario Bellini, 2020

Nel 1969, l'architetto italiano Mario Bellini ha presentato per la prima volta Chiara, una lampada da terra realizzata da un unico "foglio" piatto ripiegato su se stesso, come un lucido mantello di acciaio inossidabile. Cinquant'anni dopo il suo lancio, Flos riedita questo prodotto iconico in svariate dimensioni e finiture.

In 1969, Italian architect Mario Bellini debuted Chiara, a flat-packable floor lamp for Flos that wore a shiny cloak of stainless steel. Fifty years after its introduction, Flos is reissuing the icon in a range of sizes and finishes.

Last Order è erede della lampada da tavolo originariamente progettata per il nuovo ristorante Four Seasons di New York, dopo il suo trasferimento e riapertura nel 2018 con gli interni disegnati dall'architetto di San Paolo Isay Weinfeld.

Last Order is a continuation of the table light that was originally designed for the new Four Seasons restaurant in New York City, which relocated and opened in 2018 with the interiors designed by São Paulo-based architect Isay Weinfeld.

3H CHARGING TIME

6-24H BATTERY LIFE

Il tempo necessario per caricare completamente il dispositivo è di 3 ore (500 cicli di carica garantiti). Con il dispositivo acceso a un'intensità del 100%, l'autonomia senza fili è di 6 ore (si possono superare le 24 ore di autonomia riducendo l'intensità). Dopo 6 ore, l'intensità diminuisce automaticamente del 20% e la necessità di ricarica viene indicata con un LED (L) che lampeggia ad alta frequenza (ogni 0,2 secondi) fino a che non si collega il dispositivo a una presa elettrica o fino al completo esaurimento della batteria.

The time required to completely charge the device is 3 hours (500 charging cycles guaranteed). With the device turned on at 100% intensity, the cordless autonomy is 6 hours (more than 24 hours of autonomy can be achieved by reducing the intensity). After 6 hours, the intensity automatically decreases to 20% and the need to recharge is indicated: the LED indicator (L) blinks at high-frequency (every 0.2 seconds) until the device is plugged in to charge or the battery is completely discharged.

Il cuore di questa lampada è il frutto di una vera e propria sfida tecnologica concepita da Luke Smith-Wightman e Flos Architectural. Racchiusi in uno spessore di soli 5 millimetri LED e lenti sono in grado di generare un fascio di luce estremamente potente e controllato.

The heart of this lamp is the result of a real technological challenge conceived by Luke Smith-Wightman and Flos Architectural. The LEDs and lenses can generate an extremely powerful and controlled light beam from the inside of a just 5 mm thick space.

Una lampada a sospensione, ad altezza regolabile, è appesa all'interno di una cornice, mentre la versione wireless presenta una piastra di ricarica a induzione che alimenta una lampada a luminescenza. Normalmente appoggiata alla superficie di ricarica, la lampada può essere portata liberamente altrove, dove serve la luce.

BON JOUR VERSAILLES

Philippe Starck, 2017

Erede della lampada "Bon Jour", nata dalla collaborazione tra Flos e Starck, e del candeliere "Versailles" creato da Baccarat, la collezione Bon Jour Versailles - composta da due modelli, disponibili in cristallo o polimetilmetacrilato - rivela linee senza tempo, di ineffabile leggerezza ed empirica modernità, che evocano la memoria collettiva del passato, del presente e del futuro.

The heir to an earlier "Bon Jour" lamps collaboration between Flos and Starck and to the "Versailles" candle-holder created by Baccarat, the Bon Jour Versailles collection, with two models available in crystal or polymethylmethacrylate, reveals timeless lines with unfailing lightness and empirical modernity that evoke our collective memory of the past, of the present and the future.

LAMPADINA

Achille Castiglioni, 1972

Photo by Zoë Ghermer

I fratelli Achille e Pier Giacomo Castiglioni avevano ideato l'iconico riflettore a coppa in materia plastica trasparente. L'idea fu abbandonata per le deformazioni generate su di esso dal calore della sorgente luminosa a incandescenza. Il prototipo fu quindi sviluppato e prodotto da Flos nel 1962 con la celebre ed imponente coppa in vetro soffiato. Grazie all'uso di una innovativa sorgente luminosa a LED è oggi possibile editare Taccia in una nuova versione con diffusore in plastica trasparente, esattamente fedele all'idea originale.

In the Castiglioni brothers' original design, the iconic bowl reflector was made of transparent plastic. This idea was discarded though because the heat emitted by the incandescent light source deformed the plastic material. The prototype was then developed and produced by Flos in 1962, with its famous big blown glass bowl. Thanks to the use of a cutting-edge LED light source is now possible to edit a new version of Taccia with a transparent plastic diffuser that is accurately faithful to the original concept.

Snoopy, l'iconica lampada da tavolo disegnata nel 1967 dal genio di Achille e Pier Giacomo Castiglioni, si arricchisce di una nuova finitura per il suo inconfondibile riflettore: ai classici nero e verde si affianca il colore arancio, lo stesso che si ritrova in altri prodotti iconici dei Castiglioni, frutto di un attento studio dell'uso cromatico nel design industriale.

Snoopy, the iconic table lamp designed in 1967 by Achille and Pier Giacomo Castiglioni, is enriched with a new finish for its unmistakable reflector. The classic black and green are joined by orange, the same hue found in other iconic products by the Castiglioni brothers, the fruit of a careful study of the use of colour in industrial design.

CHIARA

Mario Bellini, 1969/2020

“Un giorno ero nel mio studio e mi è venuto in mente che si sarebbe potuto utilizzare la luce nel modo in cui si manifesta nel nostro ambiente e nel nostro paesaggio, mai diretta, ma spesso attraversata dalle nubi o riflessa dagli oggetti, dai muri e dalle superfici. Quindi anziché dire “disegniamo una lampada” mi sono detto “disegniamo un apparato che sia in grado di prendere la luce da una sorgente artificiale e rifletterla nell’ambiente con una certa intelligenza e grazia”... Ho preso una forbice, un grande foglio di cartoncino e ho iniziato a tagliare qualche cosa che potesse diventare un cilindro con alla sommità un cappello più largo che, ricongiunto sul lato destro e sinistro, avrebbe potuto servire da riflettore della sorgente di luce ospitata nella base.”
 – Mario Bellini

“One day in my studio it came to me that we could use light the way it manifests in our surroundings and our landscapes—never directly, but often through clouds or reflected off objects, walls, and surfaces. And so, instead of saying ‘let’s design a lamp’, I said, ‘let’s design an apparatus that can take light from an artificial source and send it back into our surroundings with a certain intelligence and grace’... I took some scissors, a big piece of card, and I started to cut out something that could be made into a cylinder with a wide hat on top that, when joined on the right and left-hand side, would act as a reflector of the light source housed in the base.”

Una luce che consiste in due cilindri indipendenti che si toccano in direzione perpendicolare. Uno ha il ruolo di fonte luminosa, mentre l'altro serve da base. L'angolazione del proiettore può essere regolata su tre posizioni: 25, 40 e 60 gradi, inserendo un perno fissato sulla base. Le diverse funzioni sono rese possibili grazie all'esclusione di elementi superflui e alla semplificazione della forma.

A light consisting of two independent cylinders touching each other in a perpendicular direction. One plays the role of a light source, while the other acts as a base. Its projection angle can be adjusted in three stages of 25, 40 or 60 degrees, by inserting the pin attached to the base. Various functions are made possible by doing away with excess elements and creating a simple form.

SUPERLOON

Jasper Morrison, 2015

La superficie luminosa, perfettamente omogenea e d'ispirazione "lunare", è frutto della rivoluzionaria tecnologia Edge Lighting, che unisce massime performance, efficienza e comfort visivo. Il prodotto include la funzione Dim-to-Warm: scendendo di intensità, la luce passa da un tonalità di bianco più fredda ad uno spettro più caldo, come nelle affezionate lampade a filamento.

The light surface, perfectly homogeneous and "moon-inspired", is the result of the revolutionary Edge Lighting technology, which combines maximum performance, efficiency and visual comfort. The product includes the Dim-to-Warm function: as the intensity decreases the light goes from a colder blue tone to a warmer spectrum, like in the well-loved filament lamps.

Nello stelo è incluso il sensore Soft Touch che reinventa l'interazione con il prodotto. Esso garantisce un controllo fluido e preciso del flusso luminoso con un semplice e naturale tocco della mano.

DIABOLO

Achille Castiglioni, 1998/2020

“Mio padre era veramente un ottimo giocatore di Diabolo”, dice Giovanna Castiglioni, figlia del leggendario designer italiano Achille Castiglioni. Parla di uno dei passatempi preferiti del padre, il gioco di destrezza derivante dallo yo-yo cinese, in cui un oggetto a forma di clessidra viene fatto correre avanti e indietro su un cordino tra due bacchette. Nel 1998 l'antico numero di giocoleria è servito da ispirazione per l'ultima collaborazione di Achille con Flos: l'omonima lampada a sospensione regolabile.

‘My father was a really, really good Diabolo player’, says Giovanna Castiglioni, daughter of legendary Italian designer Achille Castiglioni. She’s discussing one of his favorite pastimes—the juggling game, derived from a Chinese yo-yo, in which an hourglass-shaped object is spun back and forth on a string between two sticks. In 1998 the age-old balancing act served as inspiration for Achille’s final collaboration with Flos—an adjustable pendant lamp with the same name.

BULBO57

Achille & Pier Giacomo Castiglioni, 1957

Bulbo è stata ideata nel 1957 per un allestimento della XI Triennale di Milano. Nel progetto dell'esposizione, quando la lampada era collegata in serie a un'altra, il suo potenziale veniva drasticamente ridotto e il filamento interno assumeva un colore rossastro, che regalava una luce calda, ambientale, di leggera intensità. Nell'edizione 2019 di Flos il filamento in tungsteno è riprodotto ma con fonte a LED, mantenendo lo stesso colore e intensità della luce esattamente come per l'originale.

Bulbo was designed for an installation at the XI Triennale in Milan in 1957. A large industrial bulb deprived of its screw cap and with a shortened neck to take the shape of a bubble, with a filament inside as the distinguishing feature. The 2019 edition by Flos reproduces the classic filament in tungsten with an LED source, preserving the same color and intensity of the light as in the original.
